Chapter 1: Executive Summary

The Sulphur Springs Union District provides Transitional Kindergarten through Sixth Grade educational services to students living in an area known as Canyon Country within the Santa Clarita Valley. Located in the eastern end of the Santa Clarita Valley, the approximately 75 square miles of land that comprises the District is primarily within the jurisdiction of the City of Santa Clarita with the remainder being located within the unincorporated territory of the County of Los Angeles.

Enrollment in grades TK-6 for the current school year (2022/23) was 5,210 students at the time of the official enrollment census taken in the fall. Many schools are operating close to maximum capacity, and some schools are over the original design capacity and rely on portables to temporarily accommodate students. Projects have been proposed to provide additional space.

Residential development is projected to add 2,652 new housing units. However, when just looking at the planned developments that have been approved or started construction, a total of 2,361 of these units are projected to be built. This is an increase compared to the construction rate over the past several years and will have a major impact on the school facilities.

Applying the methodology prescribed by State law for Level 2 Fees (see next section for a more detailed discussion), this School Facilities Needs Analysis finds the Sulphur Springs Union School District is justified in levying a fee of **\$2.68 per square foot** on residential development subject to the fee. This Level 2 fee exceeds the District's 50% elementary school share of the Level 1 fee of \$2.395 by \$0.285 per square foot. The total Level 2 developer fee justified compared to last year has decreased by \$0.40 per square foot.

Expected revenues from development fees in the next five years are projected to be \$9.9 million. This fee will provide up to one-half of the cost of needed school projects, with the other half expected to be provided by the State and other local sources. Additional District funds may be required to supplement these fees to provide the quality of schools required by the District's students.

Chapter 2: Context and Legal Requirements

This document, the Sulphur Springs Union School District's School Facilities Needs Analysis, exists to fulfill a statutory requirement established by the California Government Code. A school district must prepare or have prepared a School Facilities Needs Analysis (SFNA) as a prerequisite to imposing "Alternate" fees on new housing to provide funding for additional school facilities needed to accommodate students anticipated from those new homes.

The SFNA is not used to justify other forms of fees or mitigation agreements, and is not a facilities plan or financing study for the school district. Its purpose is narrowly defined and this document should be used only to fulfill statutory requirements for the stated fees.

A. History and Context of SB 50 School Facility Fees

Senate Bill 50 (SB 50)¹ was passed during the 1998 session of the California Legislature as a comprehensive restructuring of the state's school facility construction and funding process. Parts of the legislation became effective when the state's voters approved Proposition 1-A, a \$9.2 billion school and university construction/modernization bond².

SB 50 also changed the legal process whereby builders of new homes could be required to pay for new or expanded schools to serve the new homes. A spectrum of local ordinances, policies, and requirements were largely replaced with a statewide, three-tier system. In this new system, tiers or levels are:

- Level 1: similar to 1986 fee structure, now \$4.79 per sq. foot³
- Level 2: up to 50% of the State allowed cost for construction and sites, if the school district meets specified eligibility tests⁴ (assumes State pays other 50% of cost.)
- Level 3: same as Level 2, but includes State's 50% share only when the State declares it is out of funds for new construction⁵

Level 2 Fees are new grants of authority to school districts, but are counterbalanced by a firm prohibition on other local fees and other requirements on housing developments. Level 2 Fees are referred to by the Legislation as "Alternate" fees.

A significant change with the current fee program is the local school district's ability, if it meets the eligibility tests, to impose a Level 2 fee without involving the city or county having control of land use approvals within the school district.

¹ Chapter 407, Statutes of 1998

² Statewide Proposition 1-A, November 3, 1998

³ Rate effective February 23, 2022

⁴ See Calif. Government Code Section 65995.5

⁵ Level 3 fees are currently not allowed

Many other changes to the school building process occurred with the passage of SB 50 and Proposition 1-A. This report focuses only on fees, but these changes should be viewed in the context of the amended system.

B. Legal Requirements to Impose Alternate Fees

For a school district to impose Level 2 Fees, it must meet a number of eligibility tests specified in SB 50. The Sulphur Springs Union School District has satisfied these requirements, including **3c** (over 30% debt) and **3d** (over 20% portable classrooms).

1. Apply for New Construction funding to establish a baseline capacity

The Sulphur Springs Union School District has submitted its documents to OPSC for new construction and has had its eligibility baseline established. The District will apply for new construction funding as projects arise and has one project currently in line for funding.

2. Be eligible for New Construction funding

The Sulphur Springs Union School District has been determined by the Office of Public School Construction and the State Allocation Board to be eligible for new construction funding. An application for new construction funding was submitted to OPSC is 2021 and is currently on the acknowledged list.

3. Satisfy two of the four following tests:

- a. Have substantial enrollment⁶ on Multi-Track calendar
- b. General Obligation bond in past four years with at least 50% yes vote
- c. Have issued debt or incurred obligations used for capital outlay equal to 15% of district's bonding capacity⁷
- d. Use relocatable (portable) classrooms for at least 20% of the district's total classrooms.

⁶ Generally defined as 30% of the District's K-6 enrollment; special rules for 9-12 districts.

If the debt includes landowner-voted Mello Roos debt approved after 11/4/98, then the threshold level is 30% rather than 15%.

The Sulphur Springs Union School District satisfies at least two of these four tests:

- (c) The existing capital facility debt is over 15% of the bonding capacity. The bonding capacity is \$114,309,002 and the debt is \$90,485,437 (\$61,605,437 in bonds and \$28,880,000 in COP's) for a debt ratio of 79.2%. The debt ratio would be even higher if the CFD (Community Facility District) debt of \$63,514,951 was included.
- (d) There are 60 portable classrooms of the total 279 classrooms in the District for a ratio of 21.51%. These numbers are based on the Facility Assessment and Implementation Plan dated September 2017.
- 4. Prepare a School Facilities Needs Analysis.

The Sulphur Springs Union School District caused this School Facilities Needs Analysis to be prepared for review and adoption by the Board of Education.

5. Follow the procedures and process identified in State law.

The Sulphur Springs Union School District will follow the adoption process and procedures as specified in State law.

Chapter 3: Data Used in Analysis

This Chapter presents the data used to calculate the fee. Chapter 4 contains the actual calculation. Many of these data elements are prescribed in State law and are presented as required.

Data elements to be reviewed include:

- A. Historic Pupil-per-Home yield rates
- B. Housing projection for the next five years
- C. Enrollment from new homes built in the next five years
- D. Available capacity in existing schools
- E. Grant amount per pupil
- F. Site Acquisition and Site Development allowances

A. Pupil-per-Home Yield Rates

SB 50 prescribed how pupil-per-home yield rates are to be calculated for a SFNA. The method is to identify homes built in the past five years that are similar to homes expected to be built in the projection period (the next five years).

The Student Yield Rates are to be calculated for each grade grouping which for Sulphur Springs will only be elementary school students.

The homes built in the District during the past five years was matched with the data base of students enrolled to determine these yield factors. The addresses for the housing units were compared to the student data for 2022/23. The method was to identify as many new homes built within the five year window that could be mapped in the GIS program. The permits were pulled at least 6 months prior to the date of the student data collection (October 2022) to ensure they could be occupied.

Data is presented as required by grade level group. Two housing types are shown in the following chart. SF represents single family homes and MF represents multi-family units such as condos, townhomes and apartments.

 TK-6
 Total

 SF
 0.2437
 0.2437

 MF
 0.2429
 0.2429

Pupil-per-Home yield results:

B. Housing Projection for Next Five Years

As required by SB 50, new housing units have been projected for the next five years. Data from city and county planners and developers have been used to make the projection shown below along with a review of the historic construction rates.

New Residential Units in the Next Five Years (2023/24 through 2027/28)

Dwelling Type	<u>5 Year Total</u>
SF	827
MF	1,534
All Types	2,361

These projections are estimates and precise numbers in a given year may vary from the table, however the total for the five year period reflects plans approved and in process. The number of new housing units averages 472 per year.

The average size for new housing units has averaged 2,427 square feet for SF units. The new MF units are projected to average 1,100 square feet per unit.

	Remaining			
Tract Name	Number of Units	<u>SF</u>	MF/Apt	Status
Skyline Ranch	186	186	0	Under Construction
Vista Canyon Ranch	1,100	0	1,100	Started Construction
Spring Canyon	495	495	0	Approved
Sand Canyon Plaza	580	146	434	Approved
Sub-total	2,361	827	1,534	
Mancara Ranch	109	109	0	Under Review
Park Vista	182	182		Under Review
FAIR VISIA	102	102	0	Under Review
District Totals	2,652	1,118	1,534	

This table shows all of the planned development projects in the District. Only those that have been approved or started the construction process were included in the calculations for this study.

C. Enrollment from New Housing in Five Years

Multiplying the number of new housing units by the pupil-per-home yield rate gives the expected number of pupils from the new housing units to be built in the next five years. This approach, which is prescribed in State law, has certain limitations: mainly, the yield rate is likely to be to low as new homes typically have fewer students soon after construction than will be seen after the neighborhood is established. As a result, the formula under SB 50 generally understates a school district's long term need.

SB 50 allows a five year projection to be utilized to determine the number of projected students from new residential development. Using this methodology, the District has projected the number of new housing units for the next five years and multiplied by the yield factors to determine an estimate of students to be projected from new housing.

Grade Level	Student Yields for New Residential Dev.	Students Projected
Single Family ⊺K-6 Total	0.2437	1620 Units 395 395
Multi Family TK-6 Subtotal	0.2429	1100 Units 267 267
All Development TK-6 Totals	0.2434 0.2434	2720 Units 662 662

Sulphur Springs Union School District New Students Projected by Grade Level For Development Through 2028

D. Capacity and Space Available for Students from New Residential Units

As calculated by the State's prescribed methodology on form SAB 50-02 and then adjusting for the projects constructed since the baseline was established, a total of 5,589 spaces exist in the District's schools as shown in the following table.

Т

SULPHUR SPRINGS UNION SCHOOL DISTRICT Capacity of Existing Facilities						
TK-6 SDC TOTAL SB50 Baseline Capacity (SAB 50-02): 3,575 74 3,649						
New Construction Projects	Project #	Capacity	Added/Gra	ants Funded		
Fair Oaks Ranch Elem	1	750	0	750		
Golden Oak Elem	3	525	9	534		
Leona Cox Community	4	275	0	275		
Mint Canyon Community	5	425	13	438		
Mint Canyon Community	8	50	13	63		
Valley View Elem	10	320	26	346		
Totals for Funded Projects 2,345 61 2,406						
Minus Existing Seats Paid for with COP's:466Grand Totals5,4541355,589						

* The capacity does not include 466 seats that still need to be paid for as they were funded by a COP. The current COP debt of \$28,880,000 divided by the average cost per seat of \$61,900.36 was used to determine the number of existing seats (capacity) that have not been paid for. Even with this adjustment, the projected revenues over the next five years in developer fees of \$9.9 million will fall short of paying for the debt.

The capacity for project #11 located at Sulphur Springs Community School is not included as the project has not been funded and is currently in line for State funding and is on the OPSC acknowledged list.

After determining the enrollment, the number of students must be compared to the District's existing capacity based on the "baseline" capacity total used when applying for state new construction funds. The difference between the students and existing capacity is used to determine the "space available". The "unhoused students" generated from the new housing developments are those that remain after accounting for any space available and used to calculate the allowable Level 2 Fees.

Sulphur Springs Union School District Unhoused Students from Development Through 2028

	Students From	Total Enrollment	Space	Capacity	Space	Net Unhoused
Grade Level	New Housing	through 2028	Needed	per SB 50	Available	Students
	[1]	[2]	[3]	[4]	[5]	[6]
ТК-6	562	6,743	5,212	5,454	242	320
SDC	13	152	117	135	18	0
Totals	575	6,895	5,329	5,589	260	320

[1] Projected added enrollment through 2028 based on planned residential development

[2] Based on SAB 50-01 methodology with 2361 housing units

[3] Space needed within existing facilities to house students living in existing housing units

[4] Based on SB 50 methodology of capacity calculation

[5] Space available for students from new developments

[6] Net unhoused students in 2028 due to new housing developments

The "Total Enrollment through 2028" shown in this table is for information purposes only. It shows the projected enrollment in five years based on the cohort survival methodology and adjusts for the projected impact of the 2,361 new housing units in the planned developments. It is not a demographics based analysis.

The "Space Needed" is determined based on the analysis of the District's current and past enrollments. The enrollment shown is based on the 2019 school year. (This is the peak enrolment during the past four years. In 2020 the enrollment dropped as a result of the pandemic. The enrollment has been recovering the last two years but still falls short of the 2019 values.) The result is the number of seats that need to be reserved for students from the existing housing units in the District. This insures adequate seats will be available for the housing units that are already existing within the District. The current and past enrollments are shown on the SAB 50-01 which is included in the appendix.

The "Capacity per SB 50" summarized in this table is from the calculations done on the previous page and is based on State loading standards.

The "Space Available" is determined by comparing the "Space Needed" to the "Capacity per SB 50". If the District has excess capacity, then those seats will be used to reduce the number of unhoused students projected from new developments. There are up to 260 seats available for students from new developments.

The result of this table is the "Net Unhoused Students" which will be used to determine the costs of the facility needs. Therefore, of the 575 new students projected from new developments, there are 320 (55.7%) that will need to be housed in new facilities.

E. State Construction Grant Amount for Unhoused Pupils from New Housing

When calculating the Level 2 Fees, the number of projected unhoused students is multiplied by the State's new construction grant amount. These amounts which are shown below are updated annually by the State Allocation Board each January.

State Grant Allowance for New School Projects							
Grade Level	Base Grant	Fire Alarms	Fire Sprinklers	<u>Total</u>			
TK-6	\$15,983	\$19	\$268	\$16,270			
SDC	\$30,036	\$57	\$567	\$30,660			

The following chart assumes that 2.2% of the new student population generated from new housing units will consist of special education students in special day classes (SDC). This is equal to the current ratio of students who are enrolled in special day classes.

Allowable Grant Costs for Projected Unhoused Students						
	Unhoused	Per-Pupil Grant	Total Grant			
Grade Level	Students	Allowance	<u>Cost</u>			
TK-6	320	\$16,270	\$5,206,400			
SDC	0	\$30,660	\$0			
TOTALS	320		\$5,206,400			

The cost per student amounts include State funded allowances for required fire alarm and sprinkler requirements for new school projects as of January 2023.

F. Site Acquisition and Site Development Grant Allowance

1. Eligible Site Acquisition Costs

When calculating the Level 2 Fees, the grant totals listed above are added to half the estimated site acquisition costs that are projected for the next five years, and eligible site development costs. The following table shows the total acres needed based on the CDE (California Department of Education) standards for site sizes.

Site Needs Average Size	e Schools		Projected	Equivalent	Site
		.	Unhoused	Sites	Acres
	<u>Acres</u>	<u>Students</u>	<u>Students</u>	<u>Needed</u>	Needed
Elementary	10	600	320	0.53	5.33
				TOTAL	5.33

For purposes of calculating the Level 2 fee, the District will need 5.33 acres of land. The site costs are based on acquisition at \$1,249,553 per acre for sites useable for school purposes based on Department of Education standards. This is the value of the land the District is planning to acquire. The total cost for needed land is projected to be \$6,660,117. The total amount included for 50% of the total site acquisition costs is \$3,330,059.

2. Eligible Site Development Costs

SB 50 allows the inclusion of site development costs in the fee calculation. These costs are limited to one half of the actual or estimated service site improvements, off site improvements and utility costs which would be allowed by the State Allocation Board. These improvements can include applicable drainage, utility and road improvements. In addition, the SAB has a grant that provides for general site development costs which is based on a per acre value in addition to a percentage of the projects pupil grant allowance (see Grants on page 9).

The development costs were derived from historical project costs funded by the State. The average amounts totaled \$343,921 for elementary schools. The total need is for 5.33 acres developed at a cost of \$1,833,099. The 50% eligible site development costs that can be included in the Level 2 computation totals \$1,367,599 and includes the general site development amount of \$451,049. The following figure summarizes the site acquisition and development costs.

<u>Acres</u> 5.33 5.33	<u>Acre</u> \$26,016	<u>Base Cost</u> \$138,665	<u>% Allowance</u> 6%	\$312,384	<u>Total Cost</u> \$451,049 \$451,049

Acres	Land		Development		Site
	Needed 5.33 5.33 5.33	Needed Cost/Acre 5.33 \$1,249,553 5.33 50% portion: Development (50% po Allowance/	Needed Cost/Acre Land Cost 5.33 \$1,249,553 \$6,660,117 5.33 \$6,660,117 \$6,660,117 50% portion: \$3,330,059 Development (50% portion) Allowance/ Allowance/	Needed Cost/Acre Land Cost Cost/Acre 5.33 \$1,249,553 \$6,660,117 \$343,921 5.33 \$6,660,117 \$343,921 5.33 \$6,660,117 \$343,921 5.0% portion: \$3,330,059 Development (50% portion) Allowance/ Allowance/	Needed Cost/Acre Land Cost Cost/Acre Dev. Cost 5.33 \$1,249,553 \$6,660,117 \$343,921 \$1,833,099 5.33 \$6,660,117 \$1,833,099 \$1,833,099 5.0% portion: \$3,330,059 \$916,549 Development (50% portion) Allowance/ \$1,800,059

COST OF SITES NEEDED

The "Added Cost" column was determined by multiplying the percentage allowance by the total student grants for each grade shown on page 10.

- . . .

G. Projects to be Financed with Level 2 Fees

Fees collected in the next five years will be spent on known and future school construction projects. Projects may include but are not limited to the following:

- 1. New schools
- 2. Land for new schools
- 3. Additional land needed at existing schools
- 4. New classrooms at existing schools
- 5. Additional support facilities at existing campuses to accommodate increased enrollments
- 6. Portables used for interim housing needs

As provided by State law, fees may be used for the reasonable administrative costs of collecting the fees, and for legal and other costs of justifying and imposing the fees. The developer fees are also used to make COP payments that were issued to pay for the types of projects listed above.

The District has requested State funding for a new construction project at Sulphur Springs Community School (OPSC Project #11) that will require a minimum district contribution of \$4,833,303.

Chapter 4: Calculation of Level 2 Fee

This Chapter applies the data identified above and calculates the fee justified. The process follows requirements of SB 50 as enacted in the Government Code and Education Code.

After figuring the aggregate projected costs, the total was divided by the area of the projected residential units to derive the per square foot assessment amount. Based on these calculations, the Level 2 fee within the Sulphur Springs Union School District for the next 12 months is calculated to be **\$2.68** per square foot, for residential units.

Sulphur Springs Union School District SB 50 Level 2 Developer Impact Fee Determination

		Base Nee	ed	Land Acqu	isition & Site D	evelopment	
	Unhoused	Cost per	Total	Land	Site	Total Land &

Level 2 Fee
\$ /Sq. Ft.
\$2.68

[1] Cost per student per SB 50 allowance for new construction projects.

[2] Equals one half of the estimated land acquisition costs.

[3] Equals one half of the estimated site development costs including general site development costs,

[4] Total cost assumes 5.33 acres to be acquired.

The grant amounts shown include the amounts allowed by OPSC for fire alarms and sprinklers as of January 2023.

A. Reduce Cost by Other Available Funds, Including Owned Sites

SB 50 requires that the cost of serving students from new housing be reduced by other available local funds. The Sulphur Springs Union School District potentially has several such sources of funds.

1. Fees on Senior Housing, Residential Additions, and Commercial/ Industrial Projects

Fees collected on senior housing, residential additions, and commercial or industrial development projects must be used to reduce the Level 2 fee amount, unless the fees are committed to other projects.

The District has applied these revenues to pay for modernization costs of existing facilities that provide space for students from <u>existing</u> housing that accommodates workers in the senior housing projects, residential additions, or commercial/ industrial projects. Due to the ongoing costs for modernization, these funds are not available to reduce the need for new facilities necessitated by new residential construction subject to Alternate fees⁸.

2. Voter Approved Bond Measure

The District passed a \$72 million local bond in 2012. The funds have been previously utilized and the remaining authorization is not available at this time. The remaining authorization will be needed to reduce the COP debt. Therefore, no local bond funds are available to offset costs identified in this report for students projected from new housing units.

3. Surplus Property

The District does not have any surplus property which can be used to reduce the costs of facility needs identified in this report.

Based on the preceding paragraphs, there are no local funds available to reduce costs to accommodate students from future new residential development.

B. Collection of Level 3 Fees if State Funds for the New Construction Program Are Not Available.

The Sulphur Springs Union School District has the option of levying a fee approximately two times⁹ that shown above in the event State funds for new construction are not available, as provided by Government Code Section 65995.7.

⁸ See Government Code Section 65995.5 (c)(2) and 65995.5 (f).

⁹ This amount is approximate due to the formula imposed by statute.

The Level 3 fee is calculated by the preceding methodology to be:

Level 3 Fee Calculation

	Amount
Total Facility Needs based on 50% allowance:	\$9,904,057
Total Facility Needs based on 100% allowance:	\$19,808,115
Local Funds Available:	\$0
Net Facility Needs due to residential development:	\$19,808,115
Area of projected residential units:	3,694,529
Level 3 Fee per square foot:	\$5.36

Level 3 fees greater than the Level 2 amount may be reimbursed if an agreement is established and State funds subsequently become available.

In certain cases, builders and buyers of qualifying affordable housing, may be eligible for State reimbursement of the difference between Level 2 and Level 3 fees.

The State budget proposes to allocated funds to the State Building Program which would negate the need for the imposition of Level 3 fees over the next 12 months.

Chapter 5: Nexus Between Fees and Projects Subject to Fees

California law allows school districts that have demonstrated a need for new or expanded school facilities to assess a fee on each building permit issued within its territory¹⁰. The fee can only be used to offset the capital cost needed to serve students from projects subject to the fee. (A small amount may be used for administering the fee program.) Other means of funding school building projects are available, and many residential developments provide funding for new or expanded schools by arrangements not based on this statutory authority.

A. Procedural Requirements for School Facility Fees

Before levying any fee, a school district or other public agency must show a connection between the fee and the project or activity that must pay the fee, and further must show that the fees will be used to alleviate a cost or burden caused by that development activity. Statutory and case law is clear that fees may not be used to address general or unrelated needs of the public agency. These justification requirements are sometimes known as the "Nexus tests" or "AB 1600" criteria. A nexus test demonstrates the linkage or closeness of the fee and its use to the activity causing the need. AB 1600 is shorthand for the procedural requirements found in the Government Code to levy any fee on a development project in California.¹¹.

Later sections of this chapter will address each of the statutory tests and evaluate whether School Facility Fees at the adjusted rate meet the necessary legal requirements. The facts and analyses in this document are presented for use by the governing board of this school district when making the findings needed to adopt a resolution levying a fee.

B. Background and Current Conditions in the District

The Sulphur Springs Union School District is anticipating enrollment growth and anticipates a significant part of this growth will result from continuing development of new homes, as discussed earlier in this report. Earlier sections have discussed school expansion and construction projects to accommodate students from the new homes.

Combining the preceding factors has established a cost to accommodate new students from residential developments of \$5.36 per square foot, the local one-half share of which is **\$2.68** per square foot. Fees under other statutes apply to commercial and senior housing projects.

¹⁰ See Calif. Education Code Section 17620, et seq. and Government Code Section 65995, et seq.

¹¹ See Govt. Code Section 66000, *et seq.*, also known as the Mitigation Fee Act. (Assembly Bill 1600 was the law that codified and reorganized these requirements.)

C. Specific Criteria for Levy of School Facility Fees

Various specific criteria must be satisfied to impose Level 2 School Facility Fees. The following discussion will show that the proposed Alternate fees meet these criteria.

1. <u>Purpose of the Fee: Government Code Section 66001(a)(1)</u>

School Facility Fees may be levied "for the purpose of funding the construction or reconstruction of school facilities"¹². Fees may not be used for regular maintenance, routine repair, inspection or removal of asbestos containing materials, or purposes of deferred maintenance, as defined¹³.

Level 2 School Facility Fees shall be used by this school district for the construction of school facilities at existing and future campuses. Specific uses were listed in Chapter 3.

2. <u>Uses to Which the Fee will be Put: Section 66001(a)(2)</u>

Specific uses may include but are not limited to: the design of new construction projects, acquisition of land, construction of new permanent buildings, placement of modular classrooms on a short term or long term basis, modernization and/or reconstruction projects, necessary permit and plan checking fees, testing and inspection costs, necessary furnishing and equipment, and related costs of construction projects. In addition, fees will be used for the lease of interim school facilities pending availability of newly constructed facilities. Fees may be used for the legal and administrative costs of establishing and administering the fee program and for planning needed new schools to serve growth areas.

Facilities that may be affected include those projects listed in Chapter 3 and all existing properties owned by the District and future sites to be acquired for school purposes.

In addition, Government Code Section 65995.5 (f) requires that "A fee, charge, dedication, or other requirement . . . shall be expended solely on the school facilities identified in the needs analysis as being attributable to projected enrollment growth from the construction of new residential units." This requirement is met by tracking the use of the fees in a specific accounting fund and is made public through an annual report to the school board that documents the use of such fees.

¹² Educ. Code 17620(a)(1)

¹³ Educ. Code 17620(a)(3)

3. <u>Reasonable Relationship Between Use of Fee and Type of Project on Which</u> <u>Fee is Levied: Section 66001(a)(3)</u>

For residential projects, the relationship of new homes to public school enrollment is demonstrated by the students living in the new homes. Yield data from recently built housing in the District confirms this relationship. Housing projects that prohibit occupancy by school age children typically are exempt from Level 2 Fees¹⁴.

4. <u>Reasonable Relationship Between the Need for the Public Facility and Type</u> of Project: Section 66001(a)(4)

This section will show: (1) that additional school facilities are needed to accommodate students from projects subject to the fee, (2) the school facility construction projects identified are reasonable given the need created by the projects subject to the fee, and (3) that no other funding source is available or expected which will preclude the need for fees on new development projects.

a. <u>Need for additional school facilities</u>

Enrollment projections show that all existing facilities will continue to be needed to serve existing students and enrollment other than from new development. There is insufficient space available for all the students from residential development without planning, designing, and constructing additional school facilities.

b. <u>Reasonableness of the Identified Projects</u>

The number of students expected clearly indicates the need for new school facilities. The District has considered and rejected temporary measures such as long-term use of temporary classrooms at existing schools, converting schools to a multi-track calendar, and other means of avoiding construction that will adversely affect the existing students and the community.

c. <u>Alternative Funding for the Identified Projects</u>

Other funding sources are not available or reasonably expected for the projects needed to accommodate students from new housing. Current balances in the fee fund are pledged to current projects or paying off earlier expansion, modernization, improvement, or other projects. Other funding sources are required to meet existing non-development related facility needs, including modernization/renovation of existing schools,

¹⁴ Generally, this requires a specific deed restriction.

replacement of existing temporary classrooms, or other facility needs of the school district.

5. <u>Reasonable Relationship Between Amount of Fee and Cost of Facility</u> Attributable to Development Paying Fee: Section 66001(b)

This test requires that the public agency show two relationships: (1) that the amount of the fee is properly based on the portion of the needed facility that is attributable to new development, and (2) that the amount of the expected fees from new development be feasible to have the needed project financed and built.

a. <u>Amount attributable to residential development</u>

Preceding discussion has shown that new school facilities are needed to serve students expected from future new homes. The financial analysis is based on costs per pupil so that total costs may be prorated or allocated between new development and any other causes.

b. Feasibility of funding project

The cost of needed new facilities to serve students is greater than may be funded by fees alone. The school district will seek additional funding and reductions in costs in order to provide the needed facilities. It is anticipated that bond funds, state funds, existing agreements with builders, other local funds, and future state reimbursement will provide sufficient funding to build the needed school projects. Funding, including borrowing based on fees expected more than five years in the future, may be used to allow projects to begin construction to better meet public needs.

6. Fees collected for projects more than five years in future: Section 66001(d)

It is not expected that any fees will remain unspent and held for projects more than five years after collection. School district staff will monitor requirements of this section through their annual reports on fees collected and spent.

7. Fees that are conditions of approval: Section 66005(a)

This section requires that fees imposed as a condition of approval of a development or a development project not exceed the "estimated reasonable cost of providing the service or facility for which the fee or exaction is imposed". Fees levied for school facility purposes by this school district are based on the actual cost of needed facilities and will not exceed the estimated reasonable cost of the facilities for which they are imposed.

8. <u>Time of payment of School Facility Fees: Section 66007</u>

School Facility Fees for this school district will be collected, absent other arrangements, prior to issuance of a building permit. An account has been established, ongoing appropriations have been made of funds for planning, design, or construction of needed facilities. The construction schedule for the needed school facilities identified in this plan will be within the next five years.

9. <u>Exemption for project to replace damaged buildings due to a Natural</u> Disaster: Govt. Section 66011 and Education Code Section 17626

This school district will not levy fees on projects statutorily exempt as replacements for structures damaged or destroyed by a natural disaster as determined by the Governor.

10. <u>Fees on Commercial, Industrial, and Agricultural Projects: Education Code</u> Sections 17621, 17622

This section does not apply as Level 2 Fees are not imposed on commercial, industrial, or agricultural construction projects.

D. Notice of Change and Time of Implementation

Following action of the governing board to adopt a resolution establishing rates for Level 2 Fees, staff will transmit a copy of the resolution and a map of the District's boundaries to the planning/building departments of the county and all cities which are served by the District informing those agencies of the revised amounts and the effective date of the new fees. The effective date of the fees shall be immediately upon action of the Governing Board¹⁵.

E. Conclusion

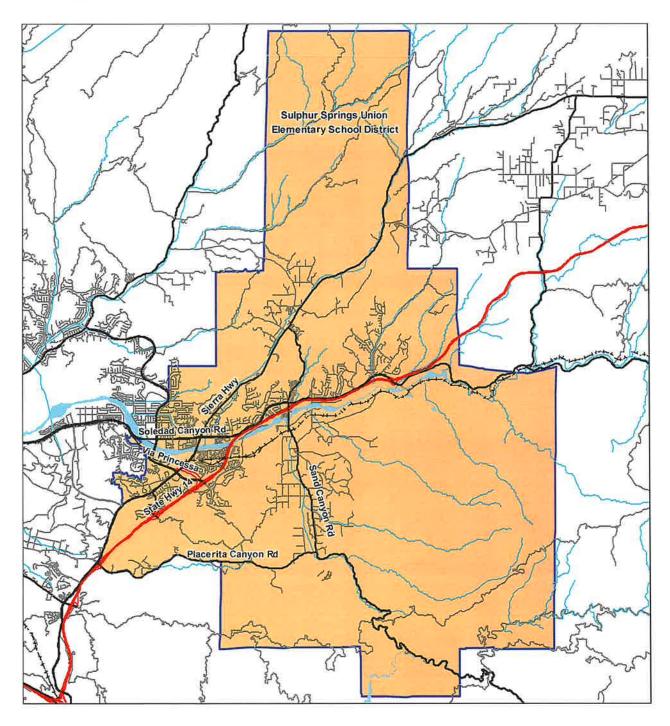

Compliance with the preceding nexus requirements establishes that the Sulphur Springs Union School District is eligible to impose these fees authorized by State law. The following map shows the geographic area for which the District is authorized to collect these fees.

¹⁵ See Government Code Section 65995.6(f).

F. District Map

The following map shows the extent of the areas for which development fees are applicable to the Sulphur Springs Union School District.

Chapter 6: Findings and Conclusions

Based on the preceding analysis, the following Conclusions are submitted for the Board's review and consideration.

- A. The Sulphur Springs Union School District has applied for and been found to be eligible for New Construction funding from the State School Facilities Program.
- B. The Sulphur Springs Union School District has completed a School Facilities Needs Analysis, and properly adopted that Analysis after providing public notice, responding to comments, and taking action as prescribed by law.
- C. The Sulphur Springs Union School District meets at least two of the four tests required by Government Code Section 65995.5 (b)(3):
 - a. The District has capital facility debt in an amount that exceeds 30% of the District's bonding capacity.
 - b. The District has at least a 20% of its classrooms in portable buildings.
- D. Fees collected under authority of Section 65995.5 or Section 65995.7 shall be expended as required by statute.
- E. The District has met necessary nexus and notice requirements.
- F. A Level 2 "Alternate" fee is justified in the amount of \$2.68 per square foot of residential development.

Respectfully Submitted,

Cynelle

I certify, as the District Representative, that the information reported on this form and, when applicable, the High School Attendance Area Residency Reporting Worksheet attached, is true and correct and that:

• I am designated as an authorized district representative by the governing board of the district.

• If the district is requesting an augmentation in the enrollment projection pursuant to Regulation Section 1859.42.1 (a), the local planning commission or approval authority has approved the tentative subdivision map used for augmentation of the enrollment and the district has identified dwelling units in that map to be contracted. All subdivision maps used for augmentation of enrollment are available at the district for review by the Office of Public School Construction (OPSC).

• This form is an exact duplicate (verbatim) of the form provided by the Office of Public School Construction. In the event a conflict should exist, then the language in the OPSC form will prevail.

Note 7 - Unearned Revenue

Unearned revenue at June 30, 2022, consisted of the following:

	 General Fund			
Federal financial assistance State categorical aid	\$ 742,172 323,200			
Total	\$ 1,065,372			

Note 8 - Long-Term Liabilities Other than OPEB and Pensions

Summary

The changes in the District's long-term liabilities other than OPEB and pensions during the year consisted of the following:

	Balance July 1, 2021		Additions		Deductions		Balance June 30, 2022		Due in One Year	
General obligation bonds Unamortized premium on bonds Unamortized discount on bonds Certificates of participation	\$	58,257,015 3,985,623 (130,860)	\$	53,071 - -	\$	(400,000) (165,848) 6,436	\$	57,910,086 3,819,775 (124,424)	\$	455,000 - -
Textbook purchase agreement CaISTRS early retirement		28,880,000 724,599		-		(358,712)		28,880,000 365,887		- 365,887
incentive Compensated absences Leases	-	2,721,721 541,947		732,811 20,462 257,505		(521,462) - (75,838)	_	2,933,070 562,409 181,667		578,649 - 85,551
Total	\$	94,980,045	\$	1,063,849	\$	(1,515,424)	\$	94,528,470	\$	1,485,087

Payments on the General Obligation Bonds will be made by the Bond Interest and Redemption Fund with local revenues. Payments on the Certificates of Participation are made by the COP Debt Service Fund. Compensated absences will be paid by the fund for which the employee worked. Early retirement incentives, the textbook purchase agreement, and the leases are paid by the General Fund.
